

# MC6 Search & Secure Procedure

- 1) A and B enter MC6 and proceed to cross gate between M05 and MC6.
- 2) A and B search the area upstream of the MC6 Target Pile and reset Box 1.  
Note: It is essential to check sides, top, interior and around all apparatus whenever possible.
- 3A) Verify that the Hatch to MB6 is locked with an OPS Lock. If not it will need to be checked. It is a Confine Space Area, you will need to get a third person, equipment and forms.
- 3) A and B proceed downstream searching the enclosure.
- 4) A waits at entrance making sure no one enters the enclosure during the search.
- 5) B continues downstream searching the enclosure and resets Box 2.
- 6) B rejoins A and exits the enclosure and reset Box #3.
- 7) Note: If the catwalk area was opened A and B will need to verify the gates and doors are closed and locked.
